Bloomberg Bitcoin Decrement ER Indices

Bloomberg Bitcoin 4% Decrement ER Index

Description

The Bloomberg Bitcoin 4% Decrement ER Index aims to reflect the total return performance of the Bloomberg IBIT Total Return Index, net of the return attributable to the Federal Funds Effective Rate-based cash index and, an additional 4% per annum decrement. The Bloomberg IBIT Total Return Index measures the total returns of the IBIT ETF (Ticker: IBIT UQ Equity) by reinvesting any dividends back to the ETF.

Source: Bloomberg. Data as of October 31, 2026. Red line on Historical Performance chart indicates the index commencement date. Performance statistics are calculated using daily data. 12-Month Trailing Returns chart is calculated using monthly data. Monthly and Annual Returns are calculated using monthly data, and shaded monthly returns are returns prior to the index commencement date. Charts and tables are provided for illustrative purposes. Past performance is no guarantee of future results.

Governance

BISL uses three primary committees to provide overall governance and oversight of its benchmark administration activities:

- The Product & Operations Committee ("POC") is responsible for the first line of control over the creation, design, production and dissemination of benchmarks administered by BISL.
- The oversight function is provided by Bloomberg's Benchmark Oversight Committee ("BOC"). The BOC is independent of the POC and is responsible for the review and challenge of the BISL Board of Directors and the POC regarding relevant aspects of the provision of Benchmarks by BISL, as set out in the UK Benchmark Regulation.
- The Risk Committee ("RiskCo") advises the Board, the POC and the BOC on the Company's overall risk appetite, tolerance and strategy and oversees the Company's risk exposure and risk strategy.

For further information, please refer to BISL's Benchmark Procedures Handbook[1].

Accessing Index Data

Bloomberg Terminal®

- I<GO> - Overview of Bloomberg Indices and how to access them.
- IN<GO> - The Bloomberg Index Browser displays the latest performance results and statistics for the indices as well as history. IN presents the indices that make up Bloomberg's global, multi-asset class index families into a hierarchical view, facilitating navigation and comparisons. The "My Indices" tab allows a user to focus on a set of favorite indices.
- DES<GO> - The index description page provides transparency into the current index universe including membership information, aggregated characteristics and returns, and historical data.
- INP<GO> - The Bloomberg Indices Publications page, which includes methodologies, factsheets, monthly reports, announcements, and technical notes. A user may also subscribe to index publications via the "Actions" button.
- PORT<GO> - Bloomberg's Portfolio & Risk Analytics solution includes tools to analyze the risk, return, and current structure of indices. PORT includes tools to analyze performance of a portfolio versus a benchmark as well as models for performance attribution, tracking error analysis, value-at-risk, scenario analysis, and optimization.

Bloomberg Indices Website (www.bloomberg.com/indices)

This index website makes available limited index information including:

- Index methodology and factsheets
- Current Performance numbers for select indices

Data Distribution

Index subscribers may choose to receive index data in the files. Files may include:

- Index level and/or constituent level returns and characteristics for any indices
- Automated delivery of files via email via SFTP
- Index data is also available via authorized redistributors

Index Licensing

Bloomberg requires index data licenses for services and products linked to the Indices

- Index or Constituent-Level Redistribution
- Exchange Traded Notes (ETNs)
- OTC Derivative Products
- Bond Pricing Service
- Index-Linked Insurance Products
- Custom Index Solutions
- Exchange Traded Funds (ETFs)
- Mutual Funds
- Separately Managed Accounts (SMAs)
