

Bloomberg Law

Connect court activity to client service and business development

The Bloomberg Law Dockets API delivers structured court activity into firm systems so teams can monitor clients and matters, analyze trends, and identify business development opportunities.

Turn docket activity into action

With the Bloomberg Law Dockets API, firms can:

- Detect new complaints, motions, orders, appeals, and counsel appearances.
- Follow case progress across clients, prospects, competitors, courts, and industries.
- Route relevant developments to the attorneys and teams responsible for the client or matter.
- Analyze activity across parties, law firms, judges, case types, and jurisdictions.
- Identify emerging claims, competitive threats, and potential litigation demand.

Monitor what matters

Normalized company and law firm data helps teams target alerts. Structured fields include:

- Companies and law firms
- Courts and jurisdictions
- Parties, counsel, and judges
- Industries and case types
- Filing types and case events
- Case status and procedural activity

Connect dockets to firm systems

Use the RESTful API and alert feed to deliver structured docket data into the systems where teams work. Bring structured court data into:

- CRM systems and client dashboards
- Firm intranets and research hubs
- Power BI and other visualization tools
- Internal applications and data pipelines

Docket Monitoring Dashboard		Updated 5:40 PM
PRIORITY DOCKET ALERTS		
New complaint	Apex Dynamics	D. Del.
Motion filed	Northstar Health	N.D. Cal.
Counsel appearance	Meridian Retail	S.D.N.Y.
Order entered	Cobalt Energy	5th Cir.
ALERTS BY CLIENT		
Apex	Northstar	Meridian
18 active matters	13 active matters	9 active matters

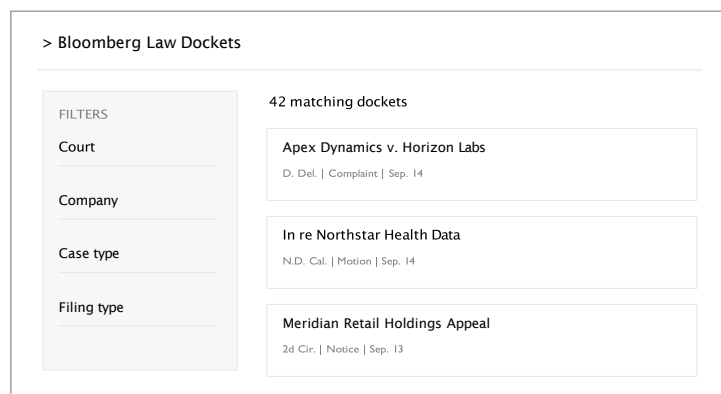

Docket alerts organized around clients, courts, and case types.

Comprehensive coverage and enriched docket data

Bloomberg Law provides broad federal, state, and select international docket coverage for search, monitoring, and analysis.

Coverage includes:

- More than 200 million dockets
- More than 100,000 docket records collected each week
- All PACER courts
- More than 1,800 state courts
- Select international courts, including the UK
- More than 80 enriched data fields
- AI-enabled filing classifications to help identify relevant filings

Search and filter activity with structured court and party data.

Tailor dashboards for how teams use docket intelligence

Litigators and regulatory practices
