

Bloomberg Law

Targeted legal and business news within your teams' workflows

The Bloomberg Law News API delivers timely legal and business news directly into your firm's systems, helping teams monitor developments that affect clients, practices, and business opportunities.

Turn timely news into action

With the Bloomberg Law News API, firms can:

- Respond sooner to litigation, regulatory, legislative, enforcement, and market shifts
- Strengthen client service by tracking issues affecting specific clients and industries
- Identify opportunities by monitoring prospects, competitors, and market activity
- Reduce the risk of missing important developments with more focused news feeds
- Centralize current awareness alongside firm knowledge and business intelligence resources

Tailor the news you receive

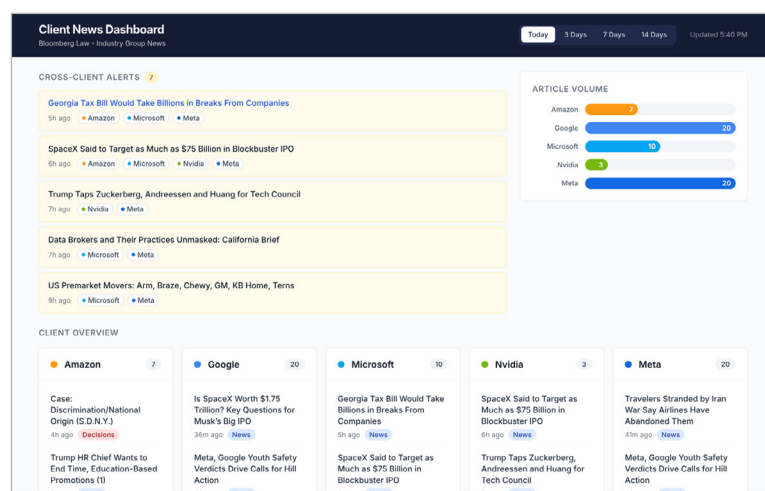

Bloomberg Law's taxonomy and enriched news data help firms organize and target coverage for practice groups, client teams, industries, offices, and more. Filters include:

- Company and law firm
- Industry and practice area
- Courts and jurisdictions
- Government agencies
- Legal and regulatory topics
- Persons, organizations, and locations

Integrate news into firm systems

The News API can support current awareness within your internal systems to match relevant coverage to the right audience. Pipe news into:

- Firm intranets
- Client dashboards
- Client relationship management (CRM) platforms
- Competitive intelligence tools, and more

Targeted news and alerts organized around clients and industries.

Deliver better advice with comprehensive coverage

Bloomberg Law reporters and editors provide timely coverage of legal, regulatory, litigation, and business developments across the United States.

Coverage includes:

- Complaints, filings, and court decisions
- Regulatory and agency activity
- Enforcement actions and investigations
- Proposed and enacted legislation
- Company, industry, and market developments
- Law firm and competitor activity
- Insights from external legal professionals

Original reporting and continuing analysis help firms follow developments and understand their broader implications.

Improve monitoring capabilities across the firm

Attorneys and practice leaders

Track developments affecting clients, matters, industries, and practice areas.

Knowledge management and library teams

Build centralized, practice-specific current awareness resources connected to research or other hubs.

Business development and competitive intelligence teams

Monitor clients, prospects, competitors, and market activity.

Client relationship and industry teams

Support client conversations, industry awareness, and strategic planning.

Scope and implementation

BLOOMBERG LAW DATA

Slowdown of Cases From NLRB to Courts Goes Beyond Lack of Quorum

The number of NLRB-related cases placed on the federal appellate court docket has fallen by 82% since 2016, including a dramatic drop last year when the NLRB lacked a quorum. This article contains step-by-step instructions to replicate this research and conduct similar analyses in Bloomberg Law.

ANALYSIS

Four State Ballot Items That May Shift Abortion Policy

Four states have abortion-related measures on the ballot Nov. 3 that could reshape their abortion laws, including two that would completely overhaul their abortion policies. In 2026, three measures seek to expand abortion access—specifically giving more authority to physicians than to legislatures—while one seeks to restrict access.
