

## Important notice

This Illustration and Case Study File (the “File”) was developed by the GFANZ Secretariat as an appendix to its December 2023 Technical Review Note, “[Scaling Transition Finance and Real-economy Decarbonization](#)” (the “Note”). The Note outlines technical considerations regarding transition finance and potential decarbonization contribution methodologies. The File is designed to provide illustrations and examples of the calculations described in the Note and is made available solely for illustrative, non-commercial use. For the avoidance of doubt, nothing express or implied in the Note or the File (together, the “Materials”) is intended to prescribe a specific course of action. None of the Materials creates legal relations or legally enforceable obligations of any kind. Each GFANZ sector-specific alliance participant unilaterally determines whether, and the extent to which, it adopts any of the potential courses of action described in the Materials.

The information in the Materials does not purport to be comprehensive and does not render any form of legal, tax, investment, accounting, financial, or other advice. The Materials are made available by the GFANZ Secretariat and have not been independently verified by any person. Nothing in the Materials constitutes an offer or a solicitation of an offer to buy or sell any securities or financial instruments and does not constitute investment advice or a recommendation by any person of an investment or divestment strategy or whether or not to “buy”, “sell”, or “hold” any security or other financial instrument.

The Materials are for informational purposes only and the information contained therein was prepared as of the date of publication. No representation, warranty, assurance, or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by GFANZ, its secretariat or by any of their respective affiliates or any of their respective officers, employees, agents, or advisors including without limitation in relation to the adequacy, accuracy, completeness, or reasonableness of the Materials, or of any other information (whether written or oral), notice, or document supplied or otherwise made available to any interested party or its advisors in connection therewith.

Members of the financial sector-specific net-zero alliances comprising GFANZ have individually made commitments consistent with the high standards of their respective alliances and are not automatically expected to refer to the technical information and considerations and adopt the principles and frameworks communicated within the Materials, although we expect all alliance participants to increase their ambition over time, so long as it is consistent with their fiduciary and contractual duties and applicable laws and regulations, including securities, banking, and antitrust laws.

The illustrations and case studies depicted in the File are purely for illustrative purposes and are not, and do not purport to be, descriptive of any real data, persons, firms or scenarios.

The File is an appendix to the Note and is expressly subject to the conditions, limitations and disclaimers applicable to the Note, including without limitation the information set forth under the headings “Acknowledgement” and “Important Notice” in the Note. By accessing the File you agree to the terms of this Important Notice and to comply with the [gfanzero.com Terms of Use](#). Without limiting the foregoing, you agree that the File may not be modified in any way or redistributed to any person.
