

# Bloomberg Enterprise Console

## Active transparency, alerting and support for your critical systems.

The Enterprise Console is a secure web-based solution providing insights, management and service to ensure the robust operation of your Bloomberg Enterprise portfolio.

Our solution is designed for Business Operations and Technologists to perform start-of-day health checks, manage connectivity, tailor alert conditions, access technical documentation, and engage with Bloomberg's global service teams – live.

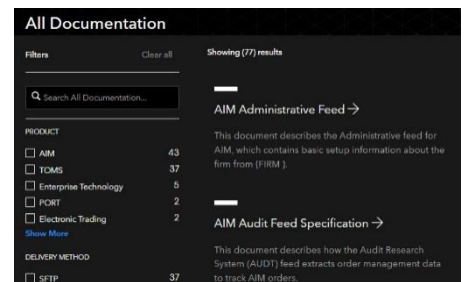

## Monitor

Track transaction rejects and acknowledgements

Analyze connectivity and integrated-application health

Build knowledge with the documentation library

**Monitor, manage and be informed of your Bloomberg OMS, Risk, EMS, Post-Trade, Automation and Data offerings.**

**Get Started:** Register at <https://console.bloomberg.com> to discover more.

# Bloomberg Enterprise Console

## Features and Capabilities

### Monitor

- Status indicators for all your connected data feeds
- Visual insights on all connected workflows and solutions
- Performance data & analytics to help you understand and design robust workflows
- Health of downstream connectivity and dependent processes

### Manage

- Administrate access and permissions across your firm
- Manage connectivity credentials including passwords and SSH Keys
- Create and renew authentication certificates
- Authorize vendor access to specific workflows and connectivity

### Inform

- Customize alarms with adjustable tolerances
- Receive real-time notifications about critical alerts
- Resolve triggered events with linked remediation guides
- Reference audit logs for configuration changes

### Develop

- Register applications to build on APIs
- Manage credentials and development keys
- Test solutions using sample code
- Design reusable templates to quickly replicate workflows

### Discover

- Catalog of API, Data and Integration product offerings
- Use case documentation and knowledge base
- Training videos
- Live Chat with Bloomberg representatives

Self-register for immediate access to foundational functionality:

- Bloomberg Professional Terminal users can run **{EC <GO>}** to launch Enterprise Console via Single Sign-On.
- All users can log in securely with their corporate email and multi-factor authentication at [console.bloomberg.com](https://console.bloomberg.com).
- Elevate your privileges via your designated administrators for full monitoring and configuration access.
