

Transaction reporting data solution.

One data. One source.

Today, banks, investments firms, asset managers and other financial institutions have to comply with an increasing number of transaction-based regulatory requirements. Conceptually, each new regulation has the same goal of creating more transparency within financial markets, however, each new regime presents an extra layer of complexity to ensure compliance. Navigating this maze of regulatory requirements can result in significant data management challenges presenting firms with the risk of non-compliance.

Bloomberg for Enterprise offers regulatory, reference and pricing data to help our clients streamline their transaction reporting requirements across regulations and help them to comply with confidence. Backed by Bloomberg’s industry leading data and our team of regulatory experts, our solutions for transaction reporting regulations help simplify the process of complying with multiple regulations with their unique requirements.

Bloomberg for Enterprise

To succeed today, financial institutions must respond to challenges that are not addressed by traditional approaches. They require world-class solutions that integrate people, processes, information and technology for the front office, middle office and operations. Bloomberg partners with these institutions to protect and capitalize on data, manage risk, deliver transparency and control costs. Through enterprise-level expertise and three decades of deep industry experience, Bloomberg creates real value through the use of innovative technology that turns data into a strategic asset and optimizes workflows and operations.
