

Enterprise Console

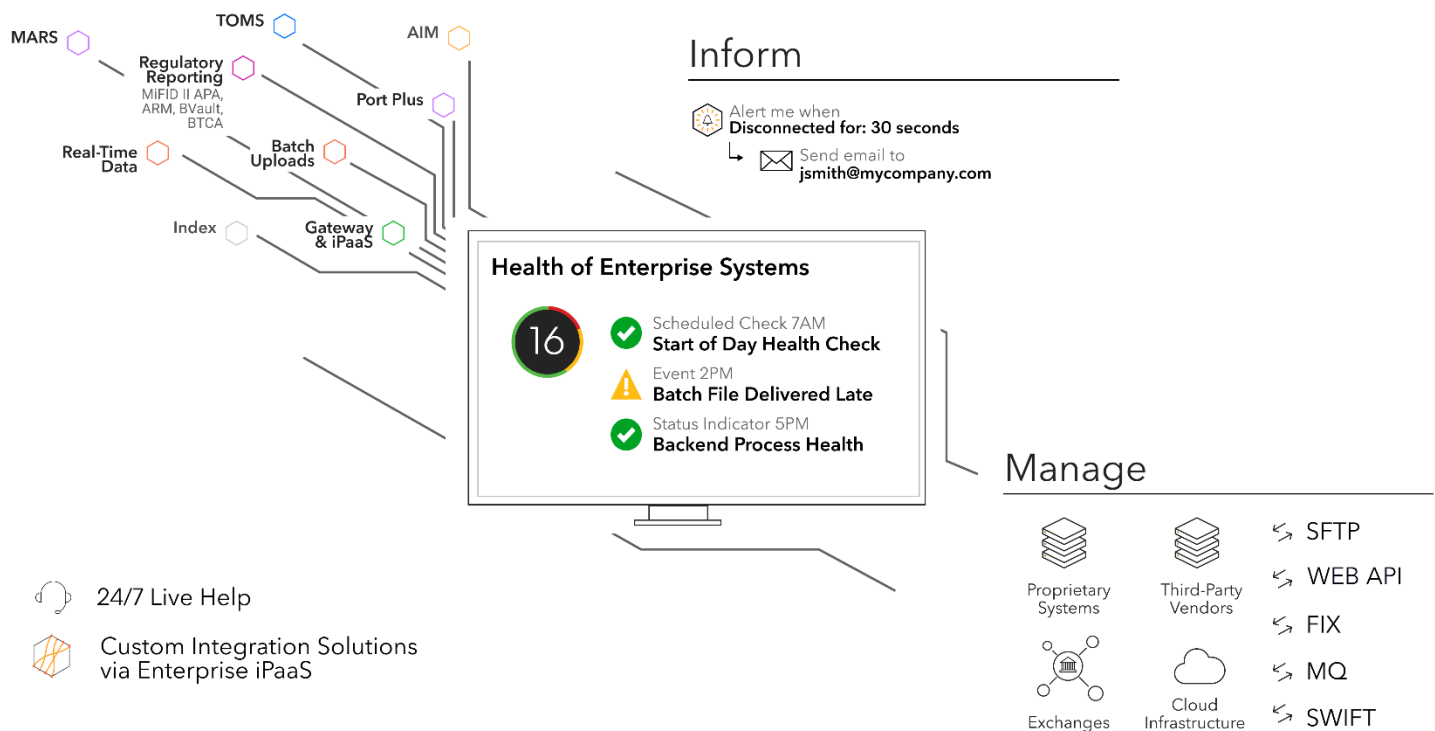

Monitor, manage and gain operational insights.

Active transparency, alerting and support

Enterprise Console is a web-based client portal that provides a centralized view of your Bloomberg enterprise products, enabling teams to monitor performance, manage services, and gain actionable operational insights.

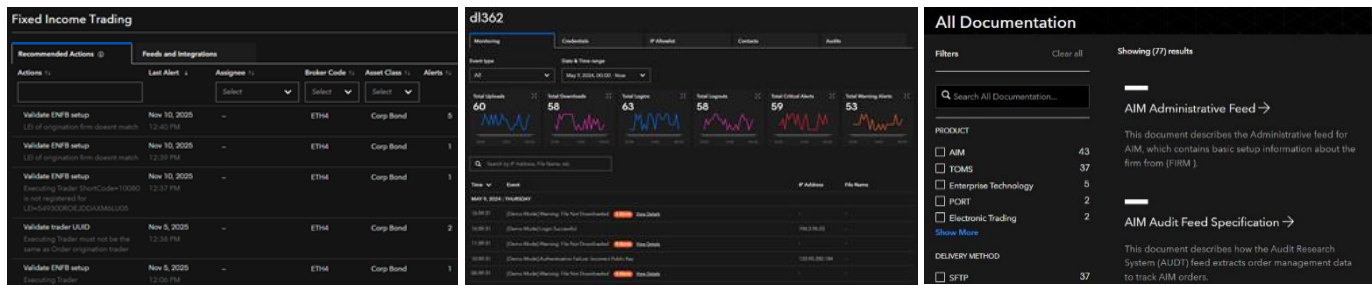

Our solution is designed for Business Operations and Technologists to perform start-of-day health checks, manage connectivity, tailor alert conditions, gain actionable insights, access policies and documentation, and engage with Bloomberg's global service teams — live.

Monitor

Self-register for immediate access to foundational functionality

- Bloomberg Professional Terminal users can run `{EC <GO>}` to launch Enterprise Console via Single Sign-On.
- All users can log in securely with their corporate email and multi-factor authentication at console.bloomberg.com.
- Elevate your privileges via your designated administrators for full monitoring and configuration access.

Review recommended actions
and remediate issues

Analyze connectivity and integrated-
application health

Build knowledge with the
documentation library

Features and capabilities

Monitor	- Status indicators for all your data feeds - Visual insights on all connected workflows and solutions - Performance data and analytics to help you understand and design robust workflows - Health of downstream connectivity and dependent processes
Manage	- Administer access and permissions across your firm - Manage connectivity credentials - Monitor uploads, understand and resolve errors, and re-upload files - Authorize vendor access to specific workflows and connectivity
Inform	- Customize alarms with adjustable tolerances - Receive real-time notifications about critical alerts - Resolve triggered events with linked remediation guides - Reference audit logs for configuration changes
Develop	- Register applications to build on APIs - Manage credentials and development keys - Explore the catalogue of API offerings, documentation, and sample code and download SDKs at developer.bloomberg.com {BDEV <GO>}
Discover	- Latest features, training and events - Technology solutions, use case documentation and knowledge base - Training videos - Live Chat with Bloomberg representatives
Action	- Resolve critical trading-related issues that need immediate attention, helping to maintain smooth operations and ensure compliance - Use product and API dashboards to troubleshoot connectivity issues and optimize cross-product operations
