

Enterprise Console

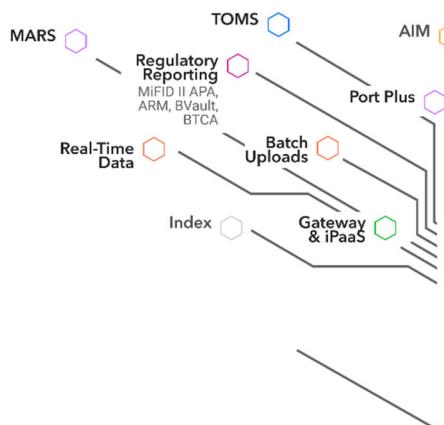

Empowering connectivity management.

Active transparency, alerting and support

The Enterprise Console is a secure web-based solution providing insights, management and service to ensure the robust operation of your Bloomberg Enterprise portfolio.

Our solution is designed for Business Operations and Technologists to perform start-of-day health checks, manage connectivity, tailor alert conditions, access technical documentation, and engage with Bloomberg's global service teams — live.

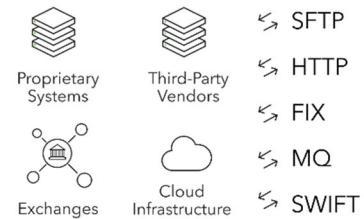

Monitor

Inform

Alert me when Disconnected for: 30 seconds
Send email to jsmith@mycompany.com

Manage

Monitor, manage and be informed of your Bloomberg OMS, Risk, EMS, Post-Trade, Automation and Data offerings.

Self-register for immediate access to foundational functionality:

- Bloomberg Professional Terminal users can run **{EC <GO>}** to launch Enterprise Console via Single Sign-On.
- All users can log in securely with their corporate email and multi-factor authentication at console.bloomberg.com.
- Elevate your privileges via your designated administrators for full monitoring and configuration access.

Track transaction rejects and acknowledgements

Analyze connectivity and integrated-application health

Build knowledge with the documentation library

Features and capabilities

Monitor	<ul style="list-style-type: none"> Status indicators for all your connected data feeds Visual insights on all connected workflows and solutions Performance data & analytics to help you understand and design robust workflows Health of downstream connectivity and dependent processes
Manage	<ul style="list-style-type: none"> Administer access and permissions across your firm Manage connectivity credentials including passwords and SSH Keys Create and renew authentication certificates Authorize vendor access to specific workflows and connectivity
